“I consider Il Trittico the peak of my work as a director”

William Friedkin

SYNOPSIS

The “Puccini by William Friedkin” documentary, produced by the Festival and the Fondazione Giacomo Puccini, made by the Lucca-based film production company Kalispéra, narrates the intense passion and profound love of director William Friedkin for the opera maestro from Lucca, Giacomo Puccini. The American director traced some of the most si-

gnificant places in the life and works of Puccini, such as the Teatro del Giglio and the Lucca Cathedral, discovering their every secret, giving the documentary the energy and power that made it into a unique, must-watch film. One maestro meets the other and Lucca is the privileged place of this magical meeting.
